

Audiobooks Management System

An overview of entire project

1. The first screen that is visible on the project is the login screen where the user logs into the management system. If the user is already a member then he must be having his personal username and password, if he doesn't have that then he can proceed to Sign Up.

2. User creates a new account by entering all the required details as personal information.

Sign up

Full Name: Shail Shah

Age: 19

Sex: ☒ Male ☐ Female ☐ Other

e-mail: abc@gmail.com

Favourite genre: ☒ Comedy ☒ Fiction ☐ Horror

☐ Sci-fi ☐ Romance ☐ Other

Next

3. User is asked to create a unique username and password. In case the username is already occupied by someone then the page will respond with “Username already taken”.

The image shows a web application window titled "Credentials". The window has a standard macOS-style title bar with a red close button, a yellow maximize button, and a green window control button. The background of the application is a blurred bokeh of colorful lights in shades of blue, green, yellow, and red. The form consists of three input fields and a button:

- Username:** A pink label with a person icon and the text "Username" is followed by a white input field containing the text "shail".
- Password:** A blue label with a key icon and the text "Password" is followed by a white input field containing the text "shah".
- Confirm Password:** A light gray label with the text "Confirm Password:" is followed by a white input field containing the text "shah".
- Check and finish:** A button with a black border and the text "Check and finish" is located at the bottom right of the form.

4. When user finishes creating a new account he again lands into the login page where can enter the credentials he just created.

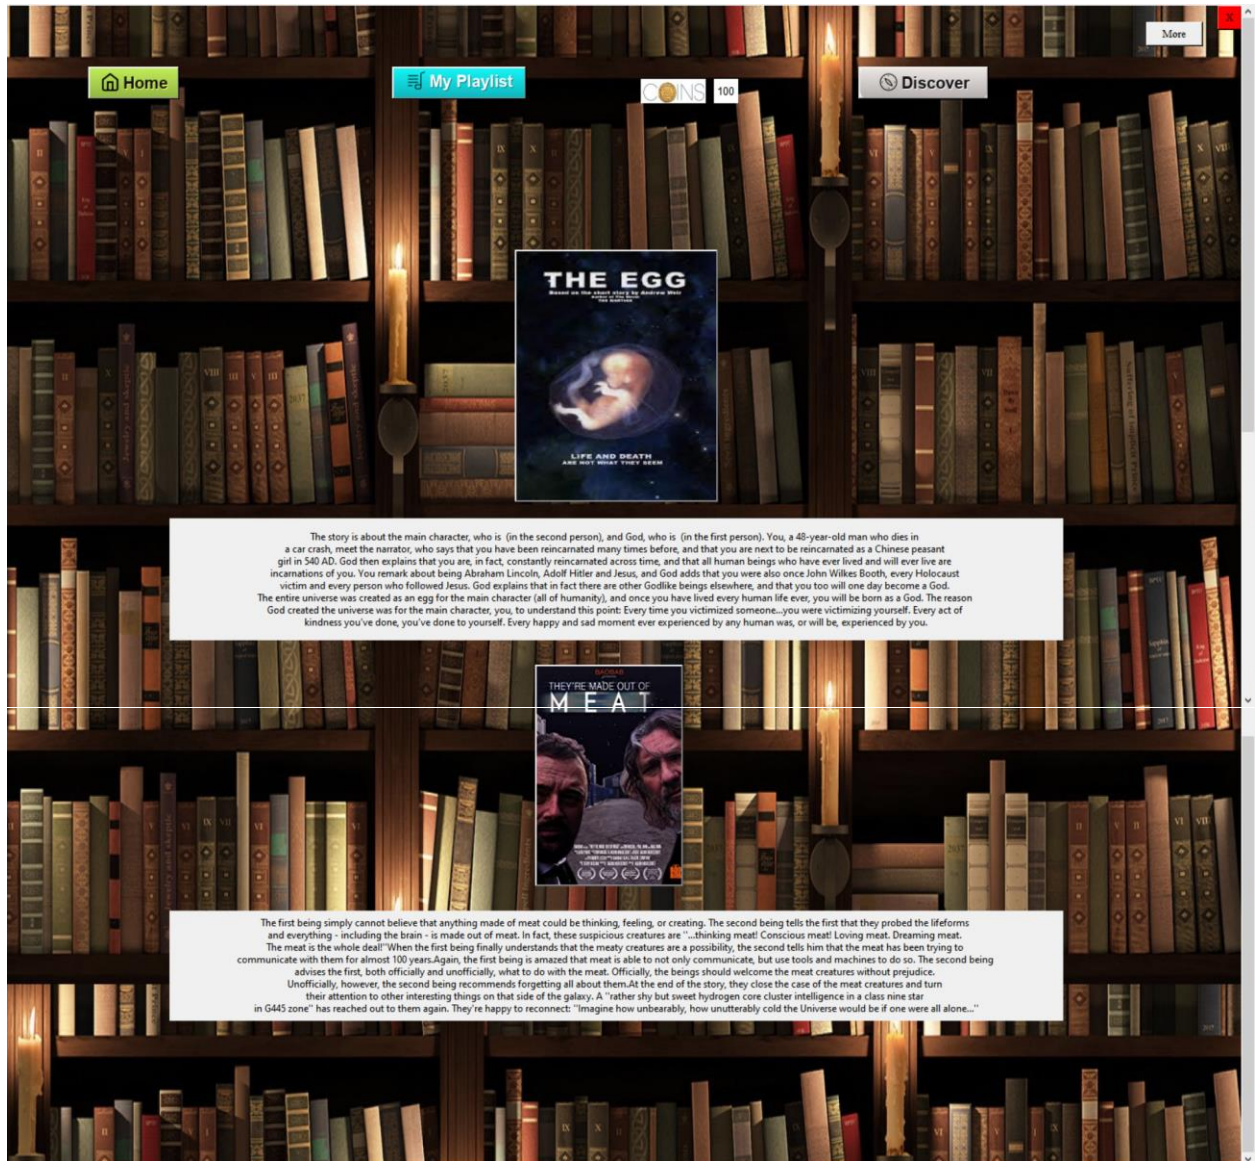

The image shows a web browser window titled "Login Page". The background is a blue and yellow abstract design. The login form consists of two rows of labels and input fields, followed by two buttons.

Label	Input Field
Username (with user icon)	shail
Password (with key icon)	****

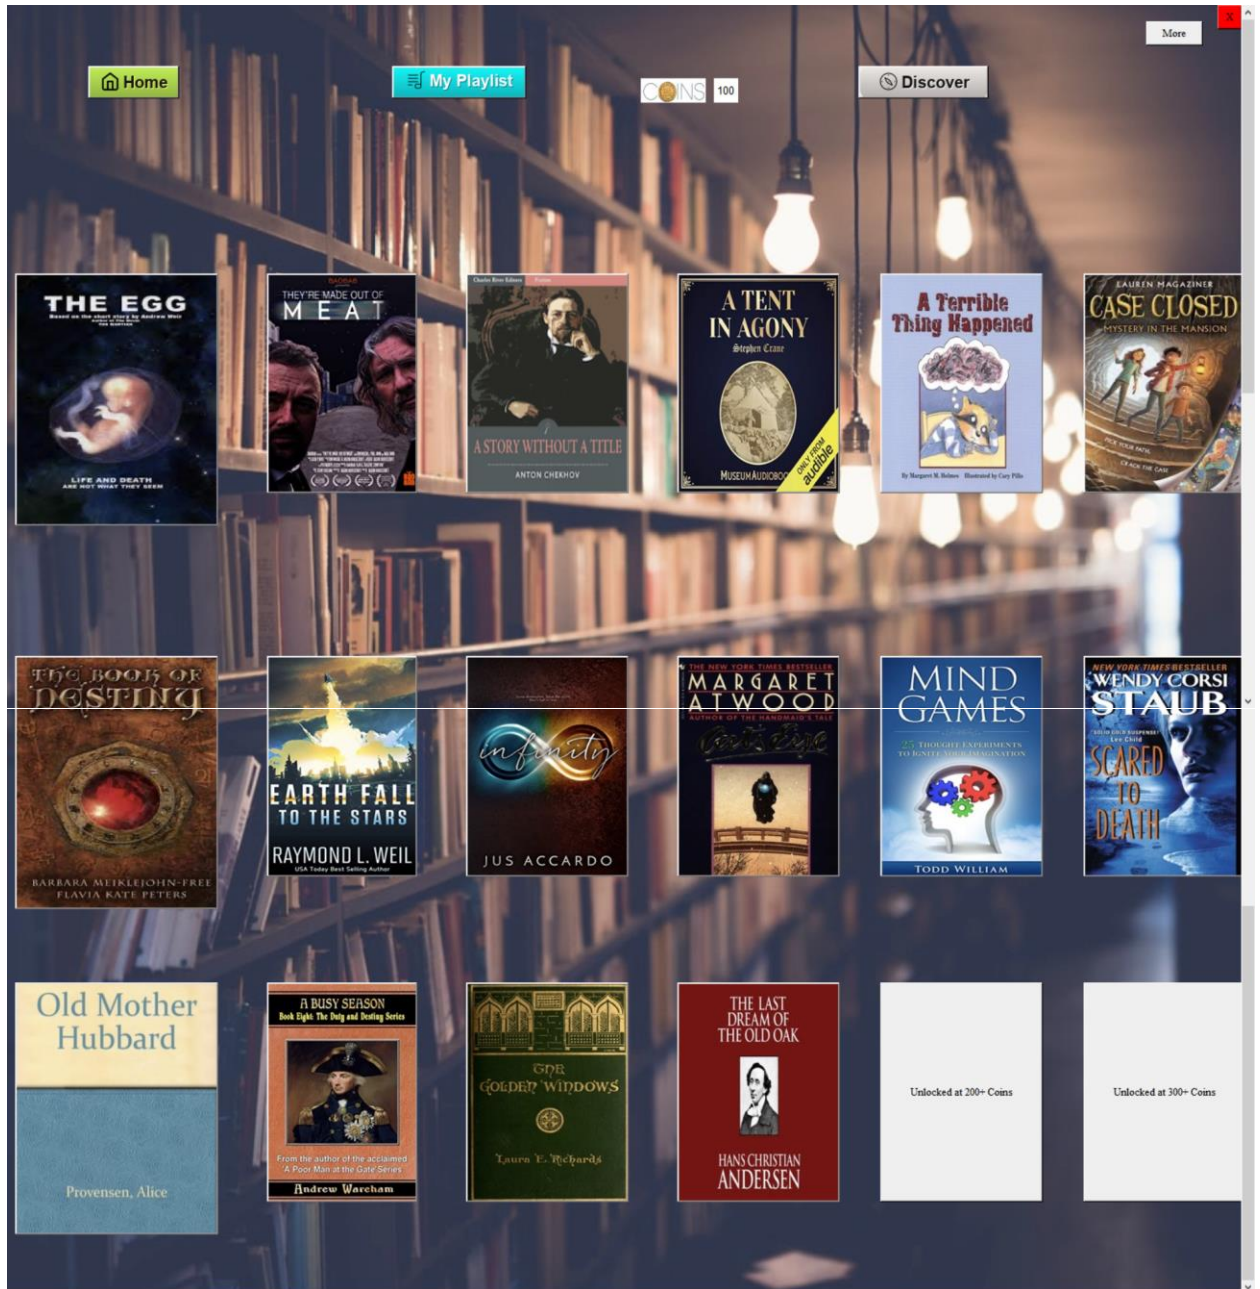

Below the input fields are two buttons:

- Login** (green button with a right arrow icon)
- SignUp** (light blue button with a left arrow icon)

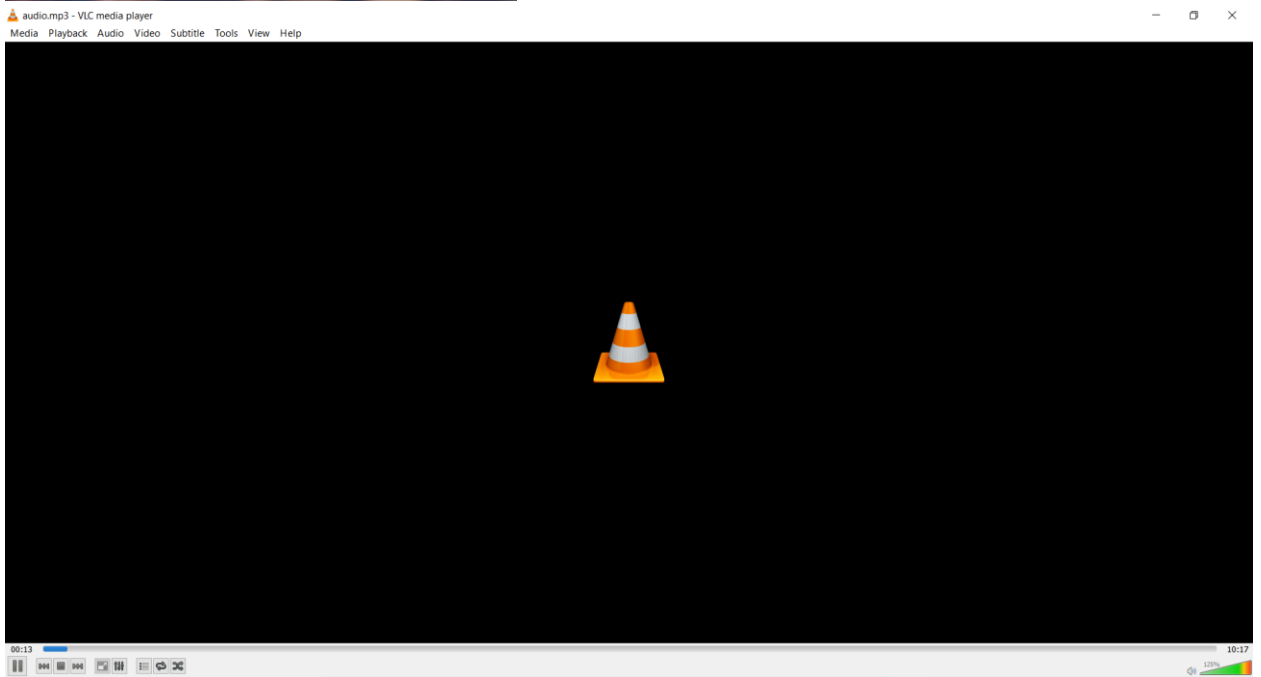

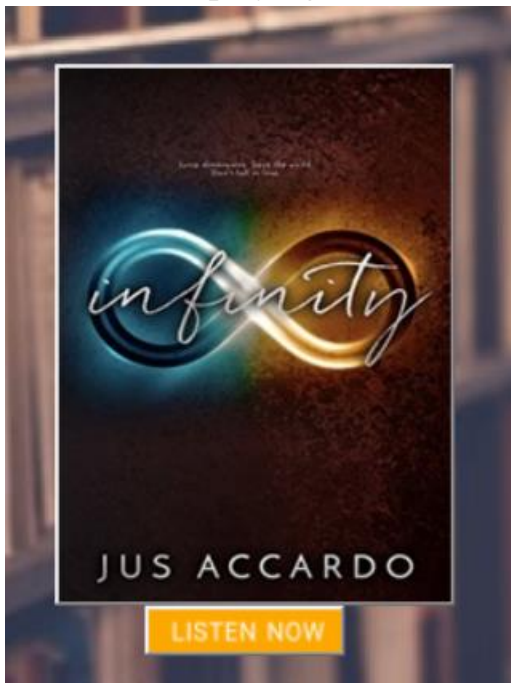

5. After entering the correct credentials the user can access the Audiobooks management system. He will be on the home page by default. He can access the playlist which has the record of all the books the user has listened to. He can also access the discover page which allows the user to listen more books.

6. On clicking on the discover button the discover page opens.

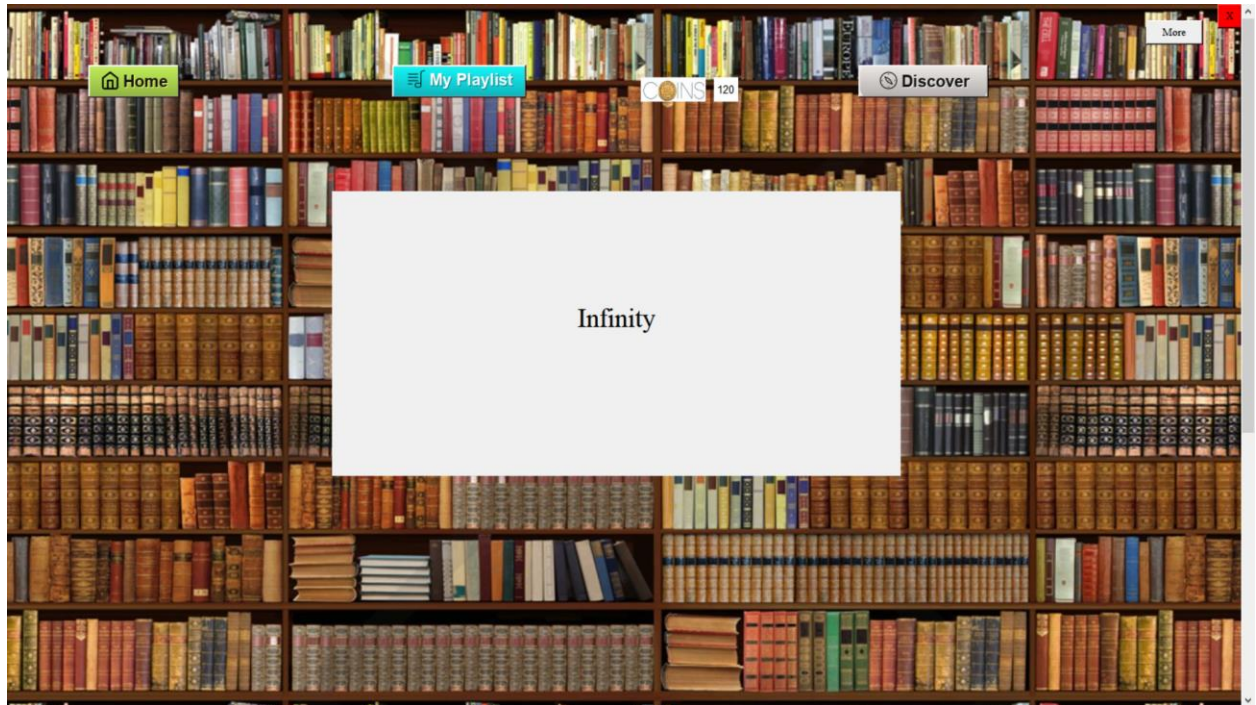

7. The user can pick a book to listen to and the text will be converted to speech and will start playing in few sec.

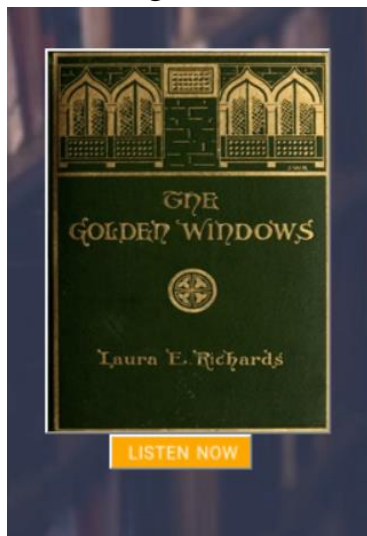

8. By listening to books the user earns 20 coins.

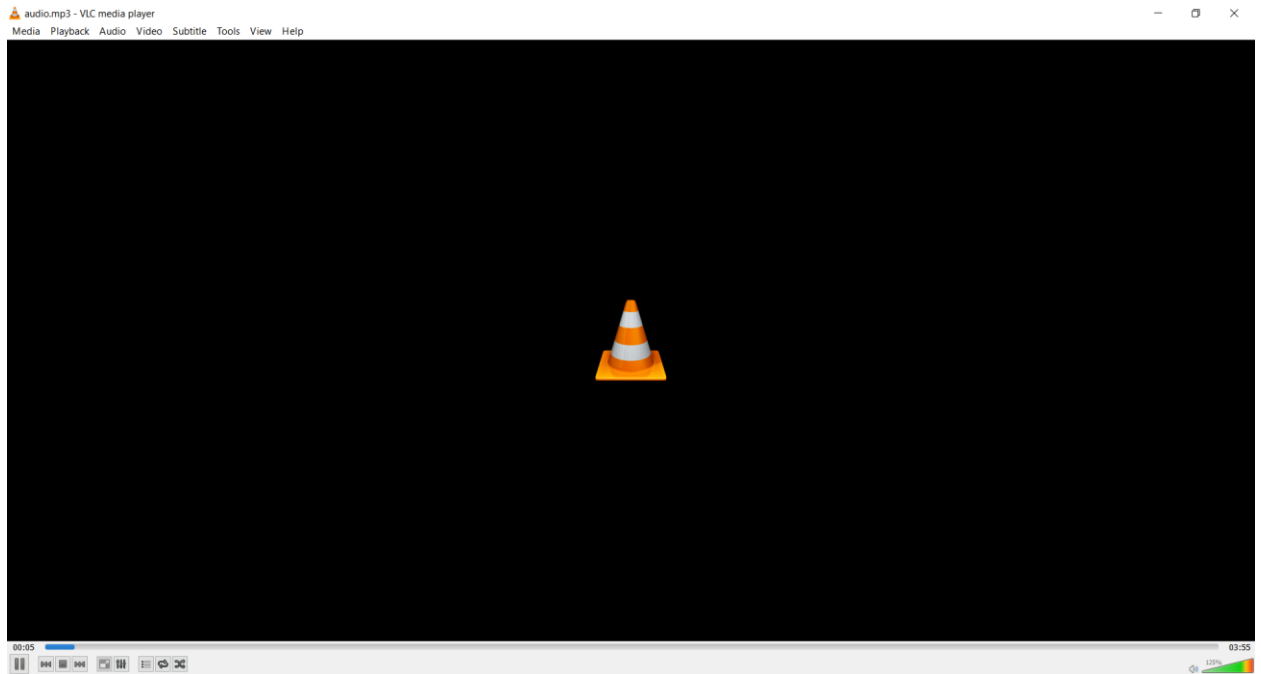

9. User can now view his playlist to check his listening record.

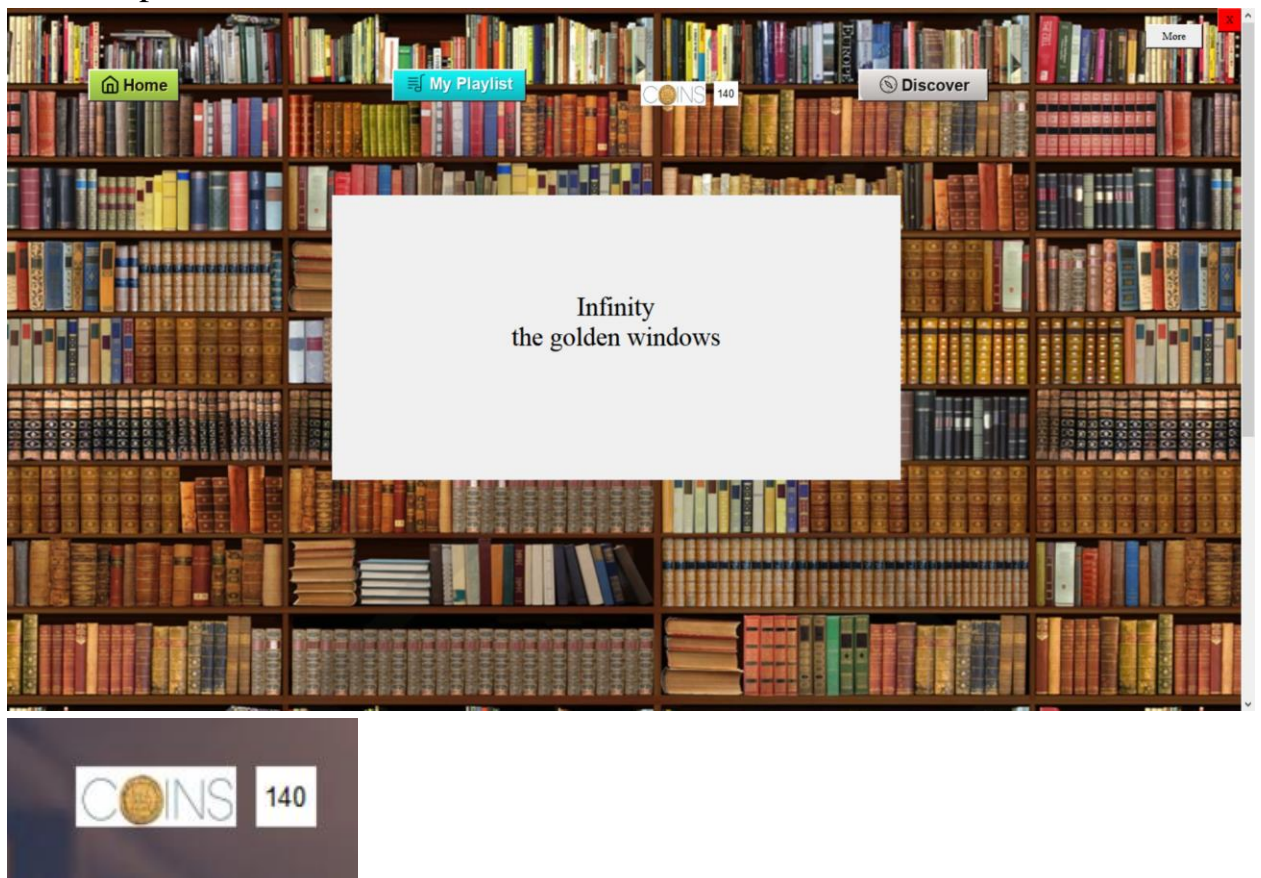

10. User can go back and listen to as many books he wants.

11. Now taking a look at the playlist again the user will see updated playlist as well as updated coins.

12. On all the pages there is a button on top-right corner with red 'X' upon clicking which will exit the system entirely.
